

Learn about butterflies in the Lake Tahoe Basin

Although the Sierra Nevada is a North American butterfly diversity “hotspot,” the Tahoe basin isn’t. But that doesn’t mean you can’t attract a fascinating array of butterflies to your garden.

This talk will cover the species you are most likely to see, and touch on the rich fauna that you can access easily within just a few miles of the Basin.

Arthur M. Shapiro is a distinguished professor of Evolution and Ecology at UC Davis, where he has been on the faculty since 1971. His research focuses on the ecology and biogeography of butterflies, and he is the author of about 300 scientific papers as well as “Field Guide to the Butterflies of the San Francisco Bay and Sacramento Valley Regions” (UC Press, 2007).

Prior to the program, join the North Lake Tahoe Demonstration Garden for a Green Thumb garden tour from 4:45 to 5:30pm outside in the Demonstration Garden’s butterfly garden.

Date: Aug. 5

Time: 4:45pm garden tour outside in Demonstration Garden.

5:30pm No-Host Bar.

Program begins promptly at 6pm.

Cost: \$5 donation requested.

Location: Assembly Room, Tahoe Center for Environmental Sciences, 291 Country Club Drive, Incline Village (on the campus of Sierra Nevada College).
