

# Venus Transit viewing at Sand Harbor

Space Science for Schools in collaboration with Sand Harbor Nevada State Park are sponsoring a free public astronomical viewing of the last Venus Transit of the solar disc this century.

The event in the past was used to establish the size of the Solar System and measurements of the size of the Sun and Venus.

Specially equipped telescopes for solar viewing will be provided by Space Science for Schools to follow this epic event.

The event is June 5 from 5-7pm at Sand Harbor.
