

# Prescribed fire in Crystal Peak Park area on Saturday

North Lake Tahoe Fire Protection District's fuels crew will continue their hazardous fuels reduction project in the Crystal Peak Park area on Nov. 10.

They will be pile burning approximately 5 acres.

This project is a cooperative effort between North Lake Tahoe Fire Protection District, Truckee Meadows Fire Protection District, Washoe County Parks Department and Nevada Division of Forestry.

The debris or slash piles were created as a result of a hazardous fuels reduction and defensible space project earlier this year, to help minimize the risk of wildland fires in the area.

The burning piles are expected to produce smoke that may be visible throughout the area. Smoke resulting from the pile burns will affect the surrounding areas for approximately 24-36 hours.
