

South Tahoe snow removal routes available online

South Lake Tahoe's "live" snow removal route interactive map is online. This tells people where snow removal operators are clearing the roadways.

Updates to the snow removal route map are provided as streets are plowed every eight, 16, and 24 hours.

The street superintendent is reminding residents to park all vehicles out of the city rights-of-way when snow conditions exist. Place mailboxes and trash cans as far back off the roadway as possible.
