

Controlled burn scheduled in Incline area

North Lake Tahoe Fire Protection District's fuels crew will continue the hazardous fuels reduction project in the Galena and Davis Creek Park areas starting Jan. 8 and continuing through the week of Jan. 14, weather permitting.

This project is a cooperative effort between North Lake Tahoe Fire Protection District, Truckee Meadows Fire Protection District, Washoe County Parks Department and Nevada Division of Forestry. The debris or slash piles were created as a result of a hazardous fuels reduction and defensible space project over the last year to help minimize the risk of wildland fires in the area.

The project's safety plan calls for cancellation of the controlled burning based on weather conditions each day, such as significant wind activity or precipitation.

The burning piles are expected to produce smoke that may be visible throughout the area. Smoke resulting from the pile burns will affect the surrounding areas for approximately 24-36 hours. People who are smoke sensitive are advised to please stay inside and close their windows and doors as much as possible until the smoke dissipates.
