

Class teaches paddleboard building

The Tahoe Maritime Museum is offering a wooden paddleboard building course starting in June.

The course will use Chesapeake Light Craft Paddle Board Kits to construct either 12-foot-6-inch or 14-foot paddleboards. The boards are built from marine plywood using a stitch and glue method.

Space is limited, so register soon by emailing katena@tahoemaritime.org. The cost is \$2,100.
