

# **S. Tahoe receives stormwater grant from state**

South Lake Tahoe has been awarded a competitive grant from the State Water Resources Control Board through the Proposition 84 Stormwater Grant Program.

The city was one of 37 applicants to make it through the first round of the application process, and one of 24 selected for funding.

South Tahoe was awarded the maximum grant amount available of \$3 million, which will be used for construction of the Bijou Area Erosion Control Project. The project will take two years starting this summer.

A total of \$42 million was given out by state for projects designed to reduce and prevent stormwater contamination of rivers, lakes, and streams.
