

TCPUD water, sewer rates to increase

Sewer and water rates are going up for Tahoe City Public Utility District customers.

When the board approved the 2014 budget this month the increases were part of the \$8.7 million operating budget. Sewer rates will increase by \$1.73 per month. Water rates will increase \$3.27 per month on average for customers using 112,000 gallons of water per year.

TCPUD is planning \$9.1 million in capital improvements. About \$3.5 million of that will come from grants.

The budget does not include general raises for employees.
