

SLT looking for ideas for city bike network

South Lake Tahoe is hosting a workshop to focus on options for additional bike routes, enhancing the bicycling experience, and reviewing strategies for promoting safe bicycling in and around the Y.

Specifically, the area is contained within the Tahoe Valley Area Plan, which is being put together.

City officials want to know what the public envisions for future links and strategies that should be considered to improve safety.

The July 21 meeting is at 5:30pm at Lake Tahoe Airport.
