

Lake Tahoe bike map updated

The Lake Tahoe Bicycle Coalition has produced an update to the Lake Tahoe Bikeways Map.

It is available throughout the Tahoe region for free.

This map illustrates the many bikeways in the Tahoe/Truckee region with one side dedicated to the South Shore area and the other side the North Shore.

A bikeway is an inclusive term used on the map to describe all facilities that bicycles may use and they include: separated bike paths, dedicated and shared highway bike lanes, neighborhood connector bike routes, and mountain biking trails. Also included on the map are points of interest, safety information, marinas, parks, and campgrounds.

Fifty thousand maps have been printed and are available at bike shops, visitor centers, lodging properties, and resorts through the region.

Maps may also be downloaded in specific geographic locations of interest.
