

# Mushroom forays in Lake Tahoe Basin

Tahoe Institute for Natural Science is planning a weekend around mushrooms in September.

The last weekend of September, TINS will sponsor excursions into the woods to search for these organisms. People will learn about their ecology and identification. Expert mycologists from Tahoe, Reno, and coastal California will be on hand.

Email Will at [will@tinsweb.org](mailto:will@tinsweb.org) to join the Sept. 27-28 forays.
