

Talk to focus on what is beneath Tahoe's surface

Geoff Schladow, director of Tahoe Environmental Research Center, will give two presentations this month about what is going on beneath Tahoe's surface.

The first is Nov. 5 at the North Tahoe Events Center in Kings Beach; the other is Nov. 6 at the Elks Point Fire Station in Round Hill. Both are from 6-7:30pm.

Schladow will share insights into Tahoe's circulation pattern research, results of the NDEP-Tahoe Water Suppliers Association 2014 Risk Assessment Report, and water resource management implications.
