

Big fish expert to give talk at UNR

Zeb Hogan, an aquatic biologist at UNR and host of the Nat Geo WILD “Monster Fish” show, has been traveling the globe for 10 years to find the biggest freshwater fish on the planet.

He will be giving a free lecture May 7 at 7pm about his adventures, travels and work to find, study and protect behemoth fish – fish that are more than 6-feet long or weigh more than 200 pounds.

The first 100 children will receive a copy of one of Hogan’s monster fish books, geared for young adult readers. There will also be a book signing following the lecture.

His research is documented in his “Monster Fish” show and in the new featured exhibition Monster Fish: In Search of the Last River Giants on display at the National Geographic Museum in Washington, D.C. through Oct. 12.

The talk is in the Redfield Auditorium in the Davidson Mathematics and Science Center on the UNR campus.
