

Nev. ready to boost drone industry to next levels

By Nicole Raz, Las Vegas Review-Journal

Nevada is at the forefront of pushing the national unmanned aircraft system or drone industry forward.

“We view all the UAS test sites as equals,” a Federal Aviation Administration spokesman said. “However, Nevada has one distinction: It’s the only site to have the ability to certify unmanned aircraft as an FAA designated airworthiness representative.”

Nevada’s FAA test site designation is giving state drone-industry players a boost to develop the industry to its limits.
