

# Liberty hosting electric vehicle summit

Liberty Utilities will host an electric vehicle summit April 24 featuring presentations by key stakeholders and displays of Tesla vehicles, a Proterra 40-foot electric bus, and a ChargePoint EV charging station.

Liberty Utilities is hosting this event to share information about an application to be submitted this summer to the California Public Utilities Commission. The proposed program would encourage electric vehicle use through the installation of EV charging stations at public locations and incentives for residential/commercial customers to install charging stations.

There will also be presentations by the Tahoe Regional Planning Authority to discuss the Regional EV Readiness Plan, ChargePoint and Clipper Creek to discuss the latest in charging technology, Tahoe Transportation District to share the Electric Bus Project, and Proterra to talk about the latest electric bus on the market.

Pre-registration is required as seating is limited. To register, contact [Kathy.carter2@libertyutilities.com](mailto:Kathy.carter2@libertyutilities.com) by April 19.

Check in at the North Tahoe Events Center in Kings Beach starts at 8:30am, with presentations from 9am-12:30pm, interaction with vendors and test drives from 12:30-2pm.
