

# Server issues impact viewing of EDC, SLT meetings

El Dorado County and South Lake Tahoe online video services are being affected by a faulty fiber optic line in the Midwest.

The Board of Supervisors' meeting could not be accessed online Tuesday because of the issue. The City Council meeting tonight will also not be available.

Online meeting agendas, minutes, archived audio and video content are likely to be inaccessible.

The service provider has not given an estimated time of repair as the issue is beyond their control. They are in the process of rerouting traffic to other circuits, however access may be limited and slower than expected.

The special City Council meeting on Aug. 29 will be available for viewing after the "live" event. This means that if the meeting concludes at 7pm, then the video will not be available for viewing until after 7pm.
