

Liberty improves online info for customers

Liberty Utilities has made two new improvements to its **website** to benefit customers.

The company said the real-time outage map has been improved to show greater details so customers have more information about unplanned and planned outages. The map will show if a crew has been dispatched or if they are assessing/working on the problem. Customers can also zoom in to see the outage area, including nearby streets. Specific addresses affected by an outage are not shown for security reasons.

Estimated restoration times will be shown. The website is also accessible via portable devices.

Information about Liberty Utilities' efforts to reduce its carbon footprint is also online.
