

Gaming win surges on South Shore

Stateline casinos bucked the statewide trend in October, with gaming revenue up more than 16 percent to \$2.29 million compared to a year ago.

Statewide the numbers released Nov. 30 by the Nevada Gaming Control Board were flat, with a 0.27 percent gain. Las Vegas numbers were down. Officials are attributing this to the massacre at the concert which has curtailed tourist traffic a bit.— *Lake Tahoe News staff report*
