

TTD wants feedback on transit in the basin

Tahoe Transportation District would like to hear from everyone—residents, commuters, and visitors who use transit in the basin.

This could be people who have been on the winter ski shuttles to access Heavenly, taken the trolley to Emerald Bay in the summer, or riders using the bus to commute or shop or some other reason.

TTD wants people to take **this survey** whether they are regular or sporadic users. Feedback will be used to help improve the transit system.
